

TECHNICAL DATA SHEET

Steam Sterilization Indicator Label

Description -

Chempack's Steam Sterilization Indicator Label is designed to allow accurate record keeping of materials that have been subject to the steam sterilization process. Chempack's unique label material prevents removal of written data by the steam sterilization process. Our adhesive allows the label to be removed after the autoclave process and reapplied to a tracking form for permanent record keeping. The Chempack Industries Steam Sterilization Indicator Label meets the performance specifications outlined in AAMI ST60 & ISO11140-1 "Sterilization of Health Care Products Chemical Indicators Part 1: General Requirements," Section 6 for Class 1 Process indicators.

Features -

- Designed for data recording and sample tracking.
- Indicator changes from Green to Grey/Black to indicate completion of the steam autoclave process.
- Easy format for recording information.
- Can be used with autoclaves, glass, metal and sterilization bag surfaces.

Benefits -

- Recorded data not removed by the steam sterilization process
- Provides means for data recording and sample tracking
- Leaves no residue requiring no post-cleaning after steam sterilization process
- Custom labels for specific process tracking are available

Applications -

- Autoclaves
- Metal trays
- Glassware
- Instruments and tools
